Introduction

Welcome to DigiBunnies, a playful and innovative meme coin that brings the world of cryptocurrencies and NFTs together. Our aim is to capture the hearts of the digital generation with our cute bunnies collection, while providing an opportunity for NFT trading.

What makes DigiBunnies special is not only the platform we are developing and trading opportunities it presents, but also the interactive experiences it offers. You can embark on exciting adventures with your digital bunnies, exploring the captivating virtual world of DigiBunnies, and unearth treasures through our innovative treasure map feature. The joy of discovering hidden bunnies and valuable assets is a thrill like no other.

Digibunnies is not just about collecting and trading, but it also serves as a vibrant platform for learning and growth. Users can engage in enlightening and entertaining quizzes, these quizzes aren't just for fun, as successful participation can earn users additional Digibunnies tokens and other prizes.

YOUR BUNNIES TEAM

OUR BUNNIES

A full collection description and unique bunnies features will be available later this year

Tokenomics (\$DGBN)

The total supply of DigiBunnies is set at 1,000,000,000,000 tokens, with no additional tokens minted or burned. Future token burns will be decided by the community.

- Public Sale: 4% of total supply, 15% at the release date. the remaining 85% will be locked for 6 months, linearly released over the subsequent 12 months
- Technical team: 5%, locked for 1 year and released linearly over 3 years
- Strategic partners: 3% of total supply locked for 6 months, linearly released over the subsequent 24 months
- Marketing/Rewards – 2% of total supply released over 3 years
- Advisory: 3% of total supply, vesting 12 months, starting from month 6.
- Ecosystem/Treasury– 81% could only be accessed through platform participation, vesting over 5 years starting from month 6.
- Private sale: 2% of total supply locked for locked for 6 months, linearly released over the subsequent 24 months.

Ecosystem/Platform

1

Ownership of Assets

Participants can earn and collect various assets, such as non-fungible tokens (NFTs) and in-game currencies. Web3 quizzes can provide an additional avenue for participants to earn these assets. By answering quiz questions correctly, players can earn rewards and potentially valuable items, which they can own and trade on blockchain marketplaces.

2

Monetization opportunities for the community

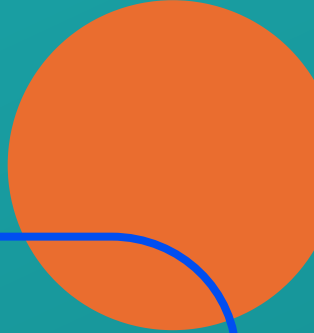

Web3 quizzes create monetization opportunities for partners and participants. By integrating tokens as rewards, revenue can be generated by participants through various mechanisms, such as transaction fees, fees for quizzes participation, or indirect partnerships with sponsors.

Ecosystem/Platform

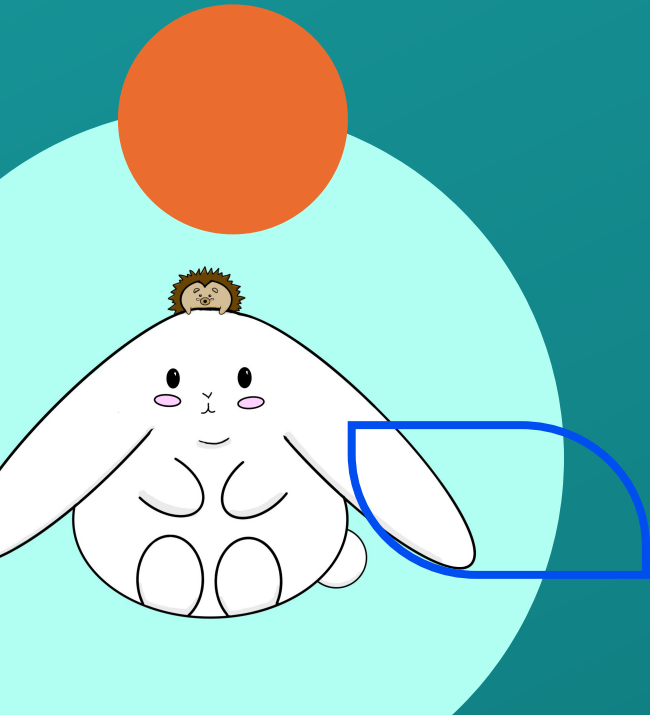

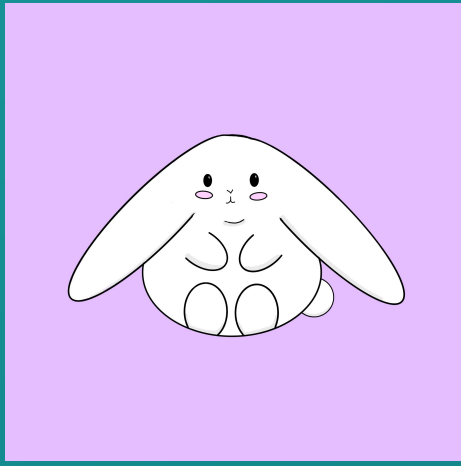

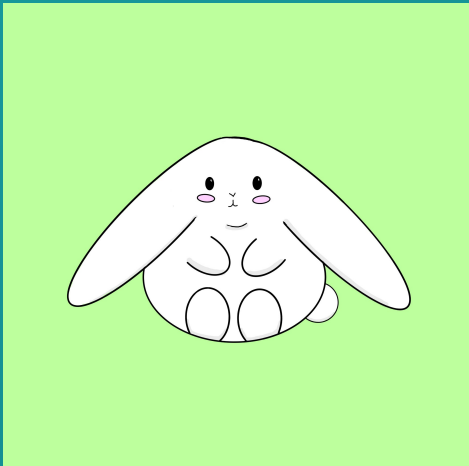

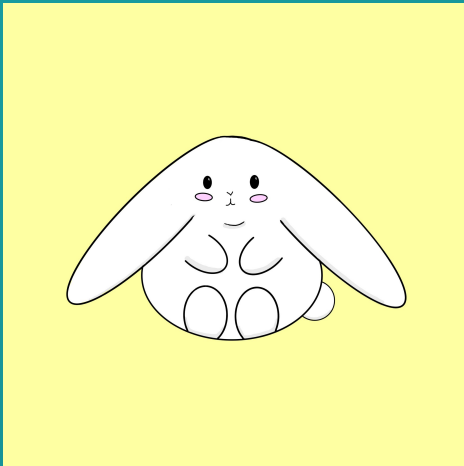

3

DigiBunnies

Each DigiBunny class will be distinctive, possessing individual traits, abilities, and limitations. Users will have the opportunity to acquire DGBN tokens, which are the essential in-platform currency. With these tokens, they can buy different resources, treasures and gear for their bunnies. These purchases could boost their strength, and enable them to acquire new skills and capabilities.

NFTs, quizzes and much more coming soon

Roadmap

Stage 1

- Audit
- Presale
- Community build and engagement

Stage 2

- NFTs minting
- Collections maps launch

Stage 3

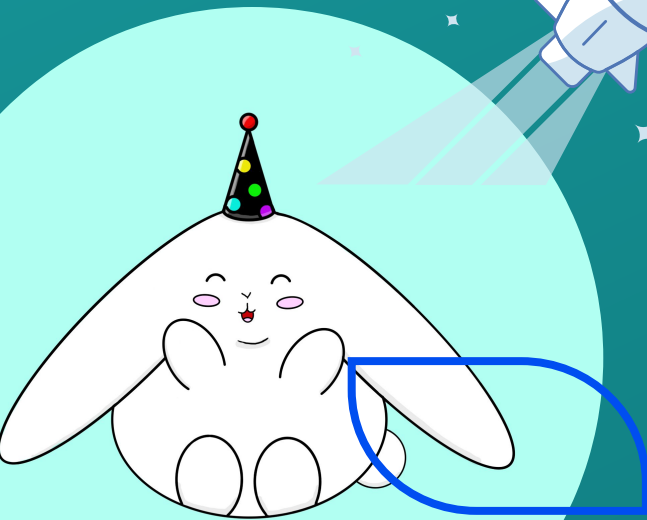

- Beta platform released
- Quizzes and Treasure hunt features released

Stage 4

- NFT battles
- Quizzes battles
- Treasure hunt events

Stage 5

- Full platform integration with the signed partners
- cross chain integration

Let the hunt begin!
